

UNDER ARMOUR PERFORMANCE MOUTHWEAR™

JAW-DROPPING PERFORMANCE Powered by ArmourBite® Mouthwear Technology

Increases Strength

Improved airflow and less stress from clenching improves strength by 17%.

Increases Endurance

Enlarges airway openings, resulting in 25% less lactic acid build up after 30 minutes of intense exercise.

Speeds Up Reaction Time

Clinical trials show an improvement in responses to auditory cues and potential improvement in response to visual cues.

Reduces Athletic Stress

Decreases cortisol production, giving less stress, fatigue and distraction

Reduces Impact

ArmourBite® Mouthguards have been shown to reduce the G-Force impact of blows to the jaw by up to 20%.

Unlock the power of your jaw

When you train and compete, your natural reaction is to clench your jaw. It's part of the "fight or flight" wiring of your brain. Your clenched jaw and teeth compress your temporomandibular joint (TMJ), triggering the release of excess amounts of performance-sapping hormones like cortisol.

ArmourBite® helps your body help itself by unlocking the power of the jaw preventing your teeth from clenching and pivoting your jaw forward to relieve pressure on the TMJ. Gone are the excess negative hormones and the energy-draining effects, so the body can now unleash its full potential.
